

Riverlake core business is strategically focused on three axes. We are a leading provider of maritime **Brokerage** services and we are **Project Management** experts developing Storage terminals for oil and gas and renewable products, including associated infrastructure such as jetties and single-point mooring systems. We are at the forefront of services associated to the industry, all of which are regrouped under our **Intelligence** unit.

**Our goal is to make our customers' business more sustainable.**

**Riverlake is aware of the opportunity and responsibility to contribute to leaving a positive footprint on the environment and society. We are committed to playing a leading role in the Energy Transition and addressing both environmental and social issues associated with our industry.**

Our strength lies in the talent of our workforce

**WE CARE**

about diversity and equality.  
about our employees and customers.

about social responsibilities.  
about work ethic.

## BROKERAGE

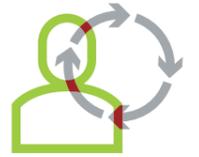

# We do business across the five Continents.

Brokerage of vessels of all sizes in dry and wet markets, deep water, inland waterways, combined with offshore marine activities, constitutes the backbone of Riverlake's shipping business.

Riverlake has consistently broadened its activities to provide its customers with thorough, all-inclusive and global shipping solutions. This is the reason why Riverlake deals on all five continents.

We are part of the panel of prominent charterers together with a large group of trustable and identified owners. By this we mean strengthening the verification of counterparts by clearly identifying the actors in the ship chartering chain. Being compliant does not only mean being identifiable. It is about working with ship owners and charterers where the checks they are subject to are carried out beyond the standard of a conventional identification. Solvency, who is who, and the analysis of the company's corporate environment are key themes in the way we operate.

We are committed to providing our customers with premium quality service and responsiveness to any kind of circumstances, from normal post-incident response to emergency preparedness. A focus on details, an ability to assign priorities and be proactive in addressing potential issues or constraints assures a seamless trip.

## PROJECT MANAGEMENT

# We are specialist Project Developers and Engineering Consultants.

Positioning Energy Storage in a sustainable future.

We are specialist Project Developers and Engineering consultants for the Energy industry, focussed on storage of Oil, Gas & Renewable products. We strive to use our knowledge to position Energy Storage and associated logistics in a better and more sustainable future.

We have a focus on cost-effectiveness, maximum flexibility and minimal Impact. As an engineering company, we have a sound and hands-on understanding of a broad range of energy-related infrastructures.

- Liquid bulk storage
- Liquid and gas products Jetties and SPM's/CBM's
- LPG and small-scale LNG Storage and Infrastructure
- Biofuel, Hydrogen and Vegetable Oil storage
- Biomass plants

## INTELLIGENCE

# We empower people to decide.

Riverlake seeks flows and market information in a neutral and unbiased manner. A comprehensive real-time and professional information is what stakeholders also need to achieve a smarter, fact-based decision making. In other words, we empower people to be able to decide.

Whether you are in the oil, gas, dry bulk, container, offshore, tug or terminal and storage markets, or whether you are a port operator, bank or hedge fund, real-time intelligence on global trade flows gives you access to the information you need to make better informed, fact-based decisions. This is what we enable you to do.

We produce accurate and detailed market studies as well as feasibility & development surveys in conjunction with our clients. We use the Riverlake cross synergies and we mobilize different local offices in different countries to produce accurate market studies and identify business opportunities.

We carry out periodic single-purpose market research. We produce tailor-made studies associated to our industry, provide advice to our clients and tell them if their project is realistic and credible.

## SUSTAINABILITY

# Riverlake's commitment to environmentally friendly operations is an ongoing initiative.

Over more than three decades, Riverlake shifted from a conventional shipbroking company into a multi-faceted maritime logistics provider.

We first started in 1985 as oil specialists. Over the years, as experts in the oil and gas sector, we have expanded our activities in the storage and transport of renewable energy, both liquid and dry. In Riverlake's view, it is of paramount importance to minimise the industry's environmental footprint. Together with our clients, we strive to participate in the development of environmentally friendly businesses. It is vital to move towards eco-friendly terminals and ships. Riverlake obviously supports the International Maritime Organisation's (IMO) call for companies to invest in alternative energy developments and sustainable technology.
